01 PROFILE

I'm a 34 years old Senior Software Engineer based in Malaysia. I love everything that has to do with technology and learning new development stacks. I work closely with other colleagues involved in projects and products. I'm able to adapt to bringing forth expertise in the system design, implementation, testing and maintenance of software systems. Proficient in various platforms, and languages, such as Laravel, NodeJS, Golang, React and VueJS for almost 6 years. Experienced with the latest cutting-edge development tools and procedures by using Git, CI/CD, Ansible and Terraform. Able to effectively self-manage during independent projects, as well as collaborate as part of a productive team.

02 EMPLOYMENT HISTORY

2014 — 2015

Melaka

Junior Software Developer at Infineon Technologies Sdn Bhd

I am responsible to develop Response Monitoring Dashboard for Camstar (Manufacturing Execution System) by using PHP, MySQL and Automate 6 (https: //www. helpsystems. com/products/automate-ultimate).

2015 — 2017

Melaka

Intermediate & Senior Software Developer at Amtis Solution Sdn Bhd

I am responsible to develop and lead a team for several web/mobile required by Government Sectors. One of them is MySocialStats developed for the Department Of Statistics, Malaysia. This system is using PHP Yii2, ElasticSearch and MySQL.

2017 — 2019

Cyberjaya

Co-Founder & Senior Software Developer at Odekan Technologies PLT

I am responsible to develop and lead a team for several web/mobile required by Government Sectors. One of them is MyCapstock developed for the Department Of Statistics, Malaysia. This system is using PHP Yii2, MongoDB and Redis. We deploy to the server using Docker technology.

2019 — 2020

Cyberjaya

Solution Architech at Raudhah Pay Sdn Bhd

I am responsible as a team lead and solution architect for Raudhah Pay payment gateway. Raudhah Pay now has more than 5000 merchants all around Malaysia. For your reference, you can surf https://www.raudhahpay.com

Skills: VueJS | Laravel | Yii2 | CI/CD | TDD | Docker | Kubernetes

2021 — Present

Kuala Lumpur

Senior Fullstack Developer at Easy Crypto New Zealand

Here's the list of my achievement

- Taking part in OKR discussion and being able to achieve most of the KRs
- Reduce CPU and RAM usage by refactoring code into workers
- Add a new payment gateway integration
- Supports and facilitates working methods from time to time
- Reduce technical debt by refactoring legacy codes
- Collaborate with cross-department team to develop web beta version
    - Working with design team to finalize ways of working
    - Following Component-Driven Development (Storybook)
    - Scaffolding Initial Code Base Structure

Skills: React.js · Laravel Lumen · Go (Programming Language) · Ansible · NestJS · Vue.js · Node.js · PHP
